

PRELIMINARY ASSESSMENT SERVICE

This service is to provide owners with an opportunity to determine if orthotic/ prosthetic management may be a suitable option for their animal. As all devices we provide are custom made, there could be many possibilities available to improve mobility.

This service provides the Animal Tech clinician the information needed to determine suitability of a custom device.

Information we require – Please fill out the form below

1. Brief history of the case
2. Photographs of the limb while standing upright
 - a. Side view
 - b. Front
3. Video of the dog walking
 - a. Side view
 - b. Front on towards the camera

Animal Tech will assess all the provided information to determine if a custom device may be possible. Animal Tech will let you know the outcome of their assessment. We will also be able to give you a price guide of estimated costs involved.

If a custom orthosis or prosthesis is suitable Animal Tech will advise the following steps of clinical service. A Veterinary referral is required to proceed with a custom device.

Preliminary Assessment Service & Report - \$75 +GST
An account will be issued prior to providing report.
